

Exchange Rate API

Real-Time Currency Exchange Rates for Developers

Mid-Market Rates from Reuters | 160+ Currencies | REST API & SDKs

exchange-rateapi.com

The Problem with Exchange Rate Data

1. Unreliable Data Sources – Many free APIs serve stale rates with hidden markups
2. Not Machine-Readable – Most APIs lack OpenAPI specs and structured error codes
3. Expensive Pricing – Accurate APIs charge \$50–\$300/month, locking out startups
4. Limited Currency Support – Competing APIs often cover only 30–50 currencies
5. No Historical Data on Free Tiers – Historical access is usually paywalled

The Solution: Exchange Rate API

A fast, reliable REST API delivering real-time and historical exchange rates for 160+ currencies – built for developers, designed for machines, powered by Reuters.

- ✗ Updated Every 60s – Real-time mid-market rates from Reuters/Refinitiv
- 160+ Currencies – Major, emerging markets, plus precious metals
- Historical Data – Access rates for any date for trend analysis
- AI & Machine Ready – OpenAPI 3.1 spec, structured errors, AI plugin manifest
- Edge-Deployed – Cloudflare Workers for sub-50ms global response times
- Free to Start – 300 requests/month free, no credit card required

API Endpoints & Capabilities

GET /api/v1/rates	Exchange Rates – real-time or historical
GET /api/v1/symbols	Supported Currencies – all 160+ codes
GET /api/rate	Public Rate (No Auth) – no key needed
GET /api/openapi.json	OpenAPI 3.1 Spec – machine-readable schema
GET /.well-known/ai-plugin.json	AI Plugin Manifest
GET /api/historical-rates	Historical Data – period queries (1d“1y)

Quick Start: Integrate in Under 5 Minutes

JavaScript / TypeScript:

```
npm install @exchangerateapi/sdk
import { ExchangeRateAPI } from "@exchangerateapi/sdk";
const client = new ExchangeRateAPI("era_live_...");
const rates = await client.getRates({ source: "USD", target: "EUR" });
```

Python:

```
pip install exchange-rateapi
from exchange_rateapi import ExchangeRateAPI
client = ExchangeRateAPI("era_live_...")
rates = client.get_rates(source="USD", target="EUR")
```

PHP:

```
composer require exchangerateapi/sdk
```

Official SDKs

JavaScript/TypeScript – @exchangerateapi/sdk

```
npm install @exchangerateapi/sdk
```

Zero dependencies | CommonJS + ESM | TypeScript types | Node.js 18+

Python – exchange-rateapi

```
pip install exchange-rateapi
```

Zero dependencies | Pure stdlib | Python 3.8+ | Type hints

PHP – exchangerateapi/sdk

```
composer require exchangerateapi/sdk
```

PHP 7.4+ | cURL + JSON | PSR-compatible | Lightweight

Institutional-Grade Data You Can Trust

Data Sources:

Reuters (Refinitiv) – global standard for institutional forex

Interbank market feeds – same rates banks use internally

Mid-market rates – true midpoint between buy and sell

No hidden spreads or markups

Updated every 60 seconds

Machine-First Design:

OpenAPI 3.1 spec at `/api/openapi.json`

Structured error codes (`error_code`) on every error

Rate-limit headers: `X-RateLimit-Limit`, `Remaining`, `Reset`

AI plugin manifest at `/.well-known/ai-plugin.json`

Consistent JSON with ISO 8601 timestamps

Built for Every Industry

Fintech & Banking – Payment apps, wallets, remittance
E-Commerce – Localized pricing, multi-currency checkouts
AI Agents & LLMs – Auto-discover via OpenAPI and ai-plugin.json
Trading & Analytics – Forex dashboards, alerts, trend analysis
Enterprise ERP – Multi-currency accounting and invoicing
Travel & Hospitality – Real-time conversion for booking platforms
Power BI & Sheets – Pull live rates into dashboards via REST
Gaming & Digital Goods – Price in-app purchases in 160+ currencies

How Exchange Rate API Works

1. Data Ingestion

Reuters & interbank feeds push rates every 60 seconds

2. Processing

Rates validated, normalized & stored in Cloudflare KV

3. Edge Delivery

Cloudflare Workers serve from 300+ global PoPs

4. Your App

Sub-50ms response via REST API or native SDK

300+ Edge Locations | 99.9% Uptime SLA | < 50ms Latency

Clean, Predictable JSON Responses

Request:

```
curl -H "Authorization: Bearer era_live_..."  
"https://exchange-rateapi.com/api/v1/rates?source=USD&target=EUR"
```

Response:

```
[{ "rate": 0.8588, "source": "USD", "target": "EUR",  
  "time": "2026-05-25T21:34:19+0000" }]
```

Response Headers:

```
X-RateLimit-Limit: 5000  
X-RateLimit-Remaining: 4832  
X-RateLimit-Reset: 2026-06-01T00:00:00.000Z
```

Simple, Developer-Friendly Pricing

Free – \$0/month

300 requests/month | Real-time rates | 160+ currencies

Small – \$4.99/month (MOST POPULAR)

5,000 requests/month | Historical data | Email support

Medium – \$9.99/month

10,000 requests/month | Priority support | Higher limits

Large – \$49.99/month

100,000 requests/month | Dedicated support | SLA guarantee

No credit card for Free | Cancel anytime | Yearly saves 17%

How Exchange Rate API Compares

Feature	Exchange Rate API	OpenExchangeRates	Fixer.io	CurrencyLayer
Free Tier	300 req/mo	1,000 req/mo	100 req/mo	100 req/mo
Currencies	160+	170+	170+	168
Update Freq	60 seconds	1 hour	1 hour	varies
Historical	All plans	Paid only	Paid only	Paid only
OpenAPI Spec	v3.1	No	No	No
AI Plugin	Yes	No	No	No
SDKs	JS, Python, PHP	Ruby, Node	None	JS, PHP
Edge Deployed	Cloudflare	No	No	No
Starting Price	Free / \$4.99	\$12/mo	\$10/mo	\$15/mo

Get Started in 3 Simple Steps

Step 1: Sign Up Free (30 seconds)

`exchange-rateapi.com/register`

No credit card – instant API key

Step 2: Install Your SDK (One command)

`npm install @exchangerateapi/sdk`

`pip install exchange-rateapi`

`composer require exchangerateapi/sdk`

Step 3: Start Building (Under 5 minutes)

Make your first API call and get live rates
